Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Group-I. Claims 1-6, drawn to a method of laying out on a virtual printed circuit board, classified in class 29, subclass 846.
 - Group-II. Claims 7-10, drawn to a method of creating clearances on a virtual printed circuit board, classified in class 29, subclass 825.
 - Group-III. Claims 11-12, drawn to a method of maintaining clearances between traces on a printed circuit board, classified in class 29, subclass 846.
 - Group-IV. Claims 13—18, drawn to a machine-readable medium to reduce crosstalk on a virtual printed circuit board, classified in class 379, subclass 417.
2. The inventions are distinct, each from the other because of the following reasons:

Groups I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01).

In the instant case, the different inventions are unrelated because of the following:

Group-I is separate and distinct from Groups II-IV because Group-I needs the step of “routing”. This step is not necessary for Groups II-IV; Group-II is separate and distinct from Group III. Groups-II and III are species and do not have genus; Group II is

separate and distinct from Group IV because they are unrelated inventions; Group III is separate and distinct from Group IV because Group III does not have a machine-readable medium.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classifications and subject matter, the search required for each invention is not required for the other. Therefore, restriction for examination purposes as indicated above is proper. See MPEP 806.05 (d).

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

6. A shortened statutory period for response to this office action is set to expire **0 (zero) months and 30 (thirty) days** from the mail date of this letter. Failure to respond within the period for response will result in **ABANDONMENT** of this application (see 35 U.S.C. 133 and MPEP 710.02, 710.02(b)).
